

# WHY GO FOR WOOD?

---

## THE UNIQUENESS OF NATURE

## THE PLAY OF LIGHT IN THE REFLECTION OF NATURAL WOOD

**INFORMATION**  
**concerning purchased furniture made from natural veneers and solid wood**

**Dear Customer,**  
**Congratulations on your purchase of BOGATTI® furniture.**

You are dealing with furniture which is made using high quality, natural materials: solid wood and natural veneer. We would like to draw your attention to the specific characteristics of these materials.

Veneer and solid wood are materials created by nature. They are characterized by colour and structural variations even within a single tree trunk, and this is what gives them their unique beauty. Let's remember that furniture made from this material is still "alive" and is subject to the influence of external conditions such as temperature and humidity. When regularly exposed to light, wood and veneer may change their shade of colour, so when making subsequent purchases you have to consider the possibility of colour differences. With proper care, the beauty of furniture will be preserved for a long time.

**We wish you a lot of satisfaction from its use.**

**PROPER FURNITURE MAINTENANCE AND USE**

1. The furniture should be used in accordance with its design and intended use.
2. The furniture should be placed on a level surface.
3. The furniture should be used in enclosed rooms that are dry and protected against the harmful influence of factors that can cause permanent damage, such as direct exposure to sunlight. Climatic conditions for furniture users are as follows:
  - relative humidity of the air between 40-70%,
  - temperature between 15-30°C.
4. Furniture must not be placed within 1 metre of sources of heat (furnace, radiator).
5. Varnished surfaces of the furniture should be protected against scratching and chipping.
6. The surface of tabletops, desks, cupboards and cabinets should be protected against direct contact with hot dishes, wetness and solvents.
7. If furniture is fitted with halogen lighting, the bulbs must not be touched with bare fingers.
8. The surface of solid wood and natural veneer furniture should be dusted with soft fabrics moistened with a diluted soap solution, and then wiped dry. Avoid use of agents containing silicone or other chemical agents for furniture maintenance, as they can adversely affect the appearance of the varnish coating. Upholstered surfaces should be cleaned using a vacuum cleaner with a soft brush.
